Quiet Stool

DESIGNER

Jasna Mujkić

YEAR OF DESIGN

2010

Quiet stool holds a special place in our hearts as it is one of the first contemporary designs, which we have developed. The boxy top and square light legs give the impression that the stool was carved out of a chunk of timber. The hand-carved motif was designed and delivered in a way to give the stool a special pattern building purpose. When one makes a line-up of Quiet stools, the hand carved motifs of adjacent stools match up and create what visually becomes a single piece, where each one is a part of the larger puzzle.

CUSTOMIZATION OPTIONS

Size and finish customization may be available upon request for larger contract orders.

* Product weights are approximate and vary based on wood species. Different wood densities affect overall weight, even within the same species. If only one weight is shown, it represents the average for maple, ash, and walnut—maple and walnut are similar, while ash is 4% heavier. Oak’s weight can be estimated by adding 11% to the net weight. These variations may impact handling, transport, and usage.
