YEAR OF DESIGN

2017

Touch Sideboard is part of the Touch Collection designed by Studioilse for Zanat. The special quality of these products lies in the hand-carved surfaces that engage our instinctive impulse to feel something and reflect our hunger for more tactile surroundings in the digital age. The carvings on the sideboard take three man-days to execute and – since the craftsmen carve the pieces at random, without drawings – each piece is unique as no two carved surfaces will ever look the same. The sideboard comes in three and four-door versions and can be mounted on 42cm or 28cm X-shaped wood or cast bronze legs. Each door hides a separate storage compartment, with a removable tray-like shelf placed mid height.

* Product weights are approximate and vary based on wood species. Different wood densities affect overall weight, even within the same species. If only one weight is shown, it represents the average for maple, ash, and walnut—maple and walnut are similar, while ash is 4% heavier. Oak's weight can be estimated by adding 11% to the net weight. These variations may impact handling, transport, and usage.
